VP05 — Dependencies by mode

Revision: `0d032e724dc923219596fc5a1cc304cef87aa7d6d0f91f52c5ce2b274bd742e8`.

requires in mode; modes have no implicit inheritance.

Required interfaces — mode Quiet

Delivery (capability)

Unconnected (capability)

Source facts: .

Declarations only.

Declarations: Delivery, Unconnected.

Scope and notation

Requires states that an Interface is necessary for a Capability in the selected Mode. It does not establish sufficiency, a provider, consumption, transport or runtime execution. Modes have no implicit inheritance. Dashed requires arrows point from Capability to Interface.

Selected mode: **Quiet**. Mode source: Quiet.

No required interfaces are declared for this mode. This does not prove independence or sufficiency.

Capability requirements

Capability	Required interface in selected mode	Source facts
Delivery	No declared requirement	—
Unconnected	No declared requirement	—

Capabilities without a declared requirement remain visible; no claim of completeness is inferred. Interfaces not required in this mode are outside this projection.
