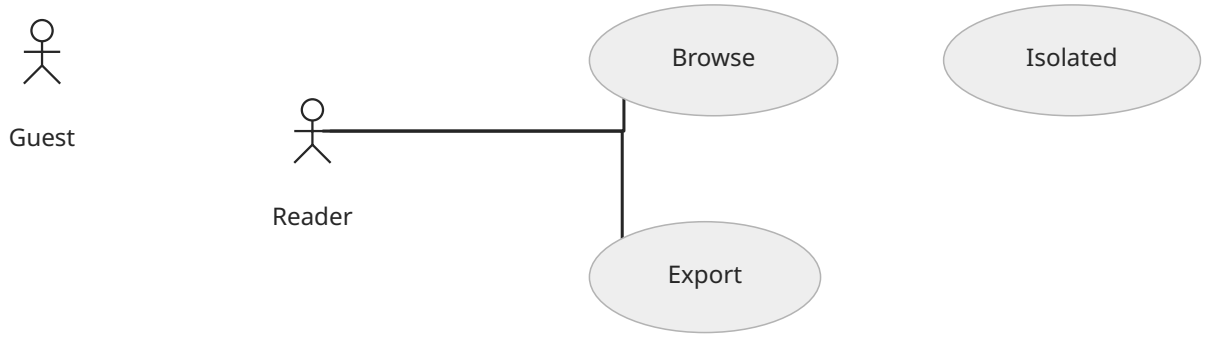
VP01 — Use cases and traceability

Revision: `9fb5d8d1fc95f22386d89e6ebcd0c283be4fb59d7a6782f56a9f0ae735759f79`.

pursues, supports and contributes-to; modeled scope without an invented System boundary.

All declared actors and use cases



Source facts: f0048, f0049.

Declarations: Browse, Export, Guest, Isolated, Reader.

Scope and notation

Complete declared actor/use-case inventory in this source snapshot, including isolated declarations. An association means SDL pursues; no System boundary or UML include/extend is inferred.

Functionality realization

Features and Functionality are not use cases. Only modeled supports and contributes-to relations are listed.

Source	Relation	Target	Fact
Display	contributes-to	Navigation	f0037
Navigation	supports	Browse	f0046

Scenario sequences and pre/postconditions are not part of this overview; they are not inferred from static relations.

Model gap NO_CONTRIBUTION: No direct or Feature-mediated Functionality contributions. (Export; mode=).

Model gap NO_ACTOR: No Actor pursues this use case. (Isolated; mode=).

Model gap NO_CONTRIBUTION: No direct or Feature-mediated Functionality contributions. (Isolated; mode=).

Model gap NO_GOAL: Actor has no pursues relation. (Guest; mode=).
