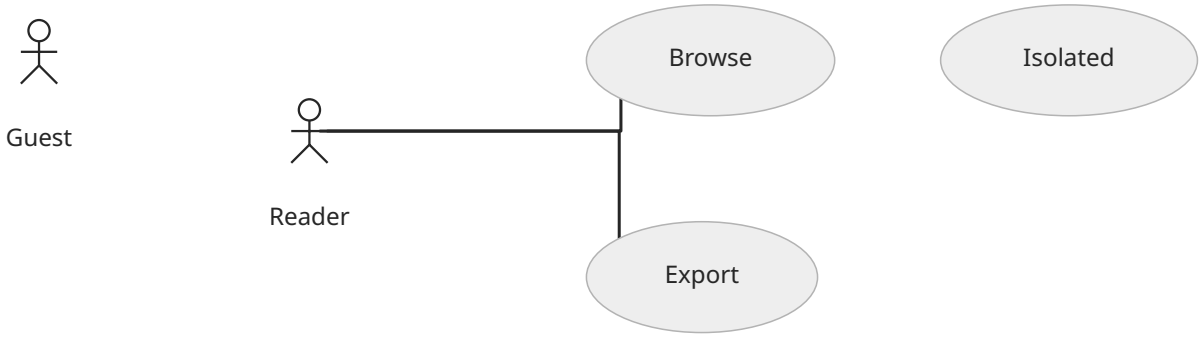
# VP01 — Use cases and traceability

Revision: `b3011e73ee1eece4b0df6861ea14435f312f5e54fcccec544f2b0ceebfe7012e`.

pursues, supports and contributes-to; modeled scope without an invented System boundary.

## All declared actors and use cases



Source facts: f0070, f0071.

Declarations: Browse, Export, Guest, Isolated, Reader.

## Scope and notation

Complete declared actor/use-case inventory in this source snapshot, including isolated declarations. An association means SDL pursues; no System boundary or UML include/extend is inferred.

## Functionality realization

Features and Functionality are not use cases. Only modeled supports and contributes-to relations are listed.

| Source | Relation | Target | Fact |
|---|---|---|---|
| Display | contributes-to | Navigation | f0037 |
| Navigation | supports | Browse | f0048 |

Scenario sequences and pre/postconditions are not part of this overview; they are not inferred from static relations.

Model gap NO_CONTRIBUTION: No direct or Feature-mediated Functionality contributions. (Export; mode=).

Model gap NO_ACTOR: No Actor pursues this use case. (Isolated; mode=).

Model gap NO_CONTRIBUTION: No direct or Feature-mediated Functionality contributions. (Isolated; mode=).

Model gap NO_GOAL: Actor has no pursues relation. (Guest; mode=).
