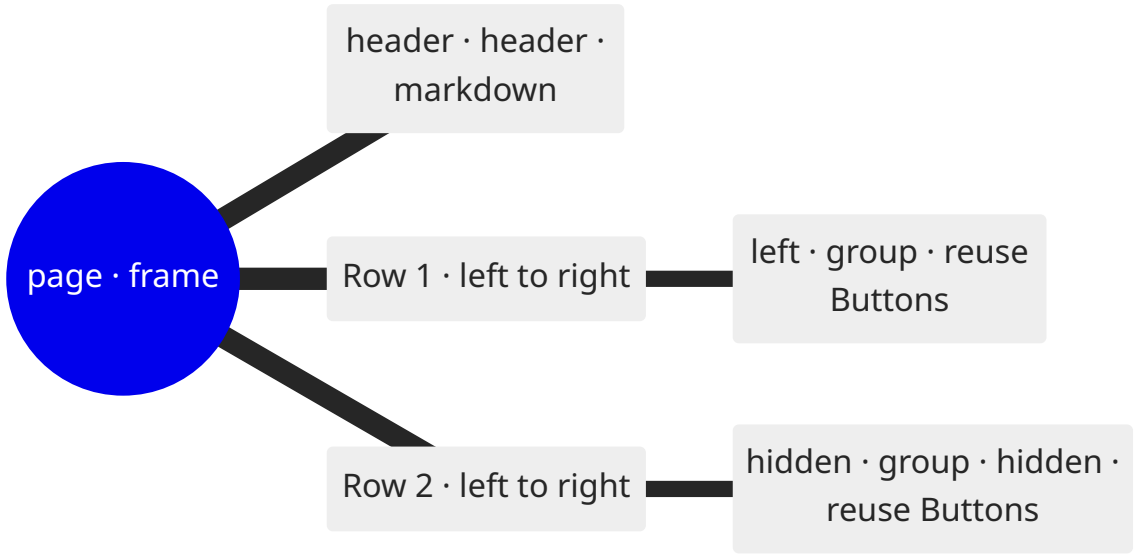
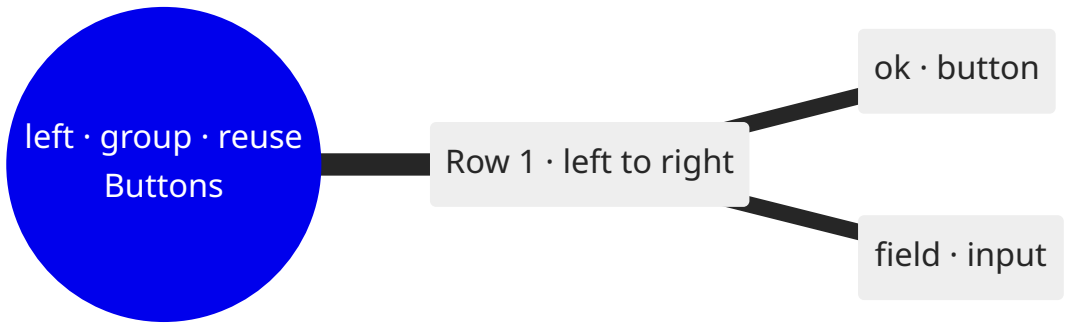
SDUI composition — `page`

Source composition maps, not live UI or measured geometry. The overview shows regions and ordered rows; nested containers have their own detail maps below. Hidden and reused instances remain visible here. The text prototype follows visibility rules.

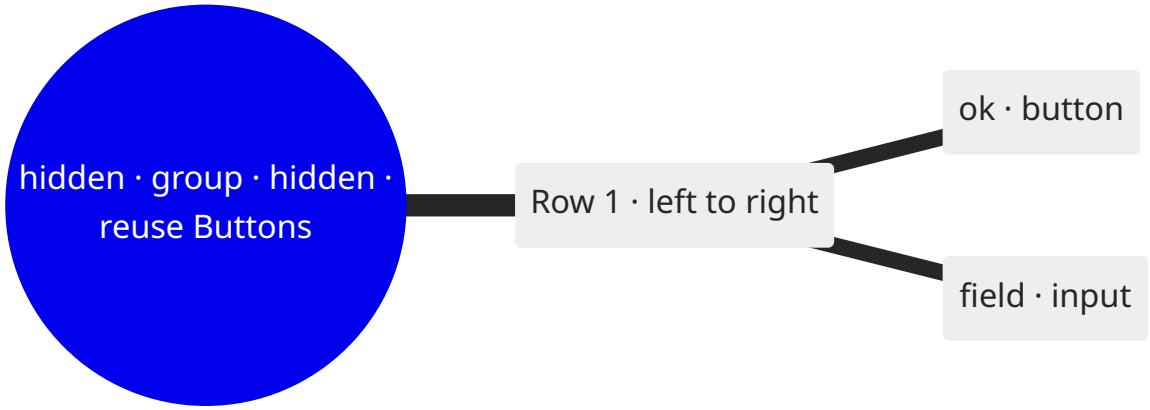
`page`



`page/left`



page/hidden



Source and bindings

Source links select exact UTF-8 byte spans from this revision. Reused instances link their declaration and use sites. Layout includes effective overrides; symbolic callbacks are not executed.

Instance	Declaration / source	Reuse sites	Layout and bindings
page	page L3:6		{} {}
page/header	L3:7		{} {}
page/left	Buttons L2:9	Buttons L3:30	{} {}
page/left/ok	L2:10		{} {"label":{"kind":"string","value":"Save","span":{"start":29,"end":35,"line":2,"column":20}}}

`page/left/field`	L2:29		`{}` `{"text":{"kind":"string","value":"Name","span":{"start":50,"end":56,"line":2,"column":41}},"value":{"kind":"string","value":"Åse","span":{"start":63,"end":69,"line":2,"column":54}}}`
`page/hidden`	Buttons L2:9	Buttons L3:44	`{"visible":false}` `{}`
`page/hidden/ok`	L2:10		`{}` `{"label":{"kind":"string","value":"Save","span":{"start":29,"end":35,"line":2,"column":20}}}`
`page/hidden/field`	L2:29		`{}` `{"text":{"kind":"string","value":"Name","span":{"start":50,"end":56,"line":2,"column":41}},"value":{"kind":"string","value":"Åse","span":{"start":63,"end":69,"line":2,"column":54}}}`

SDUI — `page`

Static GUI dump. Buttons and fields are text labels; no callbacks execute.

Layout overview

Row/column structure in terminal cells. Heights follow content; this is not measured GUI geometry.

```
SDUI GUI dump | page | 160 columns | structural preview
## Prototype
[ Save ]
             Name: [Åse]
```

Content

Markdown is rendered as content. Nested blockquotes represent groups and frames. Horizontal siblings appear in reading order here; the overview shows placement. Mermaid diagrams are omitted.
