VP07 — Features across the architecture

Revision: `e2a2f39e5c78476bb1bba08e406114367eb59953f02a63e952e435c880d24007`.

contributes-to, owns and explicit allocated-to per mode. Unspecified allocation is reported as a gap.

Complete logical architecture and feature

realization — mode NormalDesktop

Scope and notation

All declared Systems, containers and units form the logical architecture base, including isolated declarations. Rectangles show the complete structural base with contains edges. Feature keys annotate logical owners (owns) and selected-mode containers (allocated-to), derived only through explicit Functionality contribution paths. Rounded standalone Features have no represented placement. These annotations are not new direct SDL relations. This is decomposition and responsibility, not an inferred deployment or call graph.

Selected mode: **NormalDesktop**. Only this mode's explicit allocated-to facts inform placement annotations. Ownership does not imply allocation; missing placement is reported below.

Feature legend

Key	Feature
F01	ChapterNavigation
F02	ConfigurableScrolling
F03	DocumentNavigation

F04	DocumentReferences
F05	LivePreview
F06	MarkdownPresentation
F07	MermaidDiagrams
F08	PagedPublication
F09	SynchronizedScrolling
F10	WorkPathNavigation
