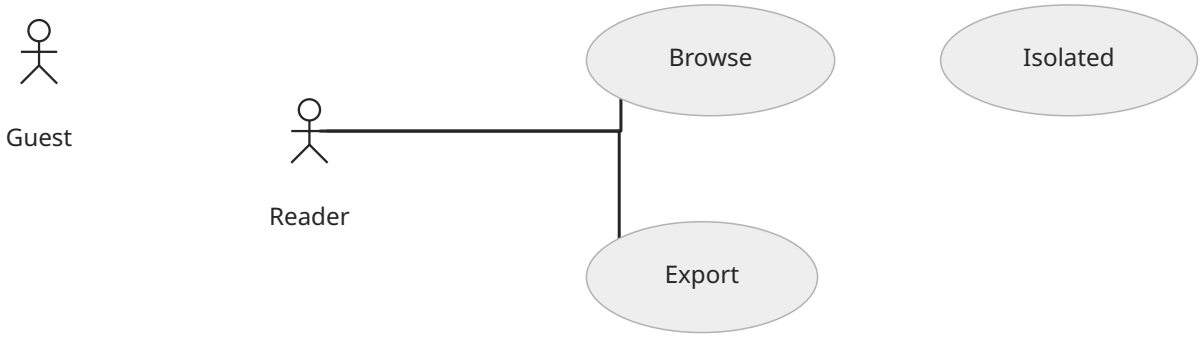
VP01 — Use cases and traceability

Revision: `9bdf257d7dd88f39825fe82522955ed8a94df2f790add690ced1c615edf4bd30`.

pursues, supports and contributes-to; modeled scope without an invented System boundary.

All declared actors and use cases



Source facts: f0005, f0006.

Scope and notation

Complete declared actor/use-case inventory in this source snapshot, including isolated declarations. An association means SDL pursues; no System boundary or UML include/extend is inferred.

Functionality realization

Features and Functionality are not use cases. Only modeled supports and contributes-to relations are listed.

Source	Relation	Target	Fact
Display	contributes-to	Navigation	f0003
Navigation	supports	Browse	f0004

Scenario sequences and pre/postconditions are not part of this overview; they are not inferred from static relations.

Model gap NO_CONTRIBUTION: No direct or Feature-mediated Functionality contributions. (Export; mode=).

Model gap NO_ACTOR: No Actor pursues this use case. (Isolated; mode=).

Model gap NO_CONTRIBUTION: No direct or Feature-mediated Functionality contributions. (Isolated; mode=).

Model gap NO_GOAL: Actor has no pursues relation. (Guest; mode=).
