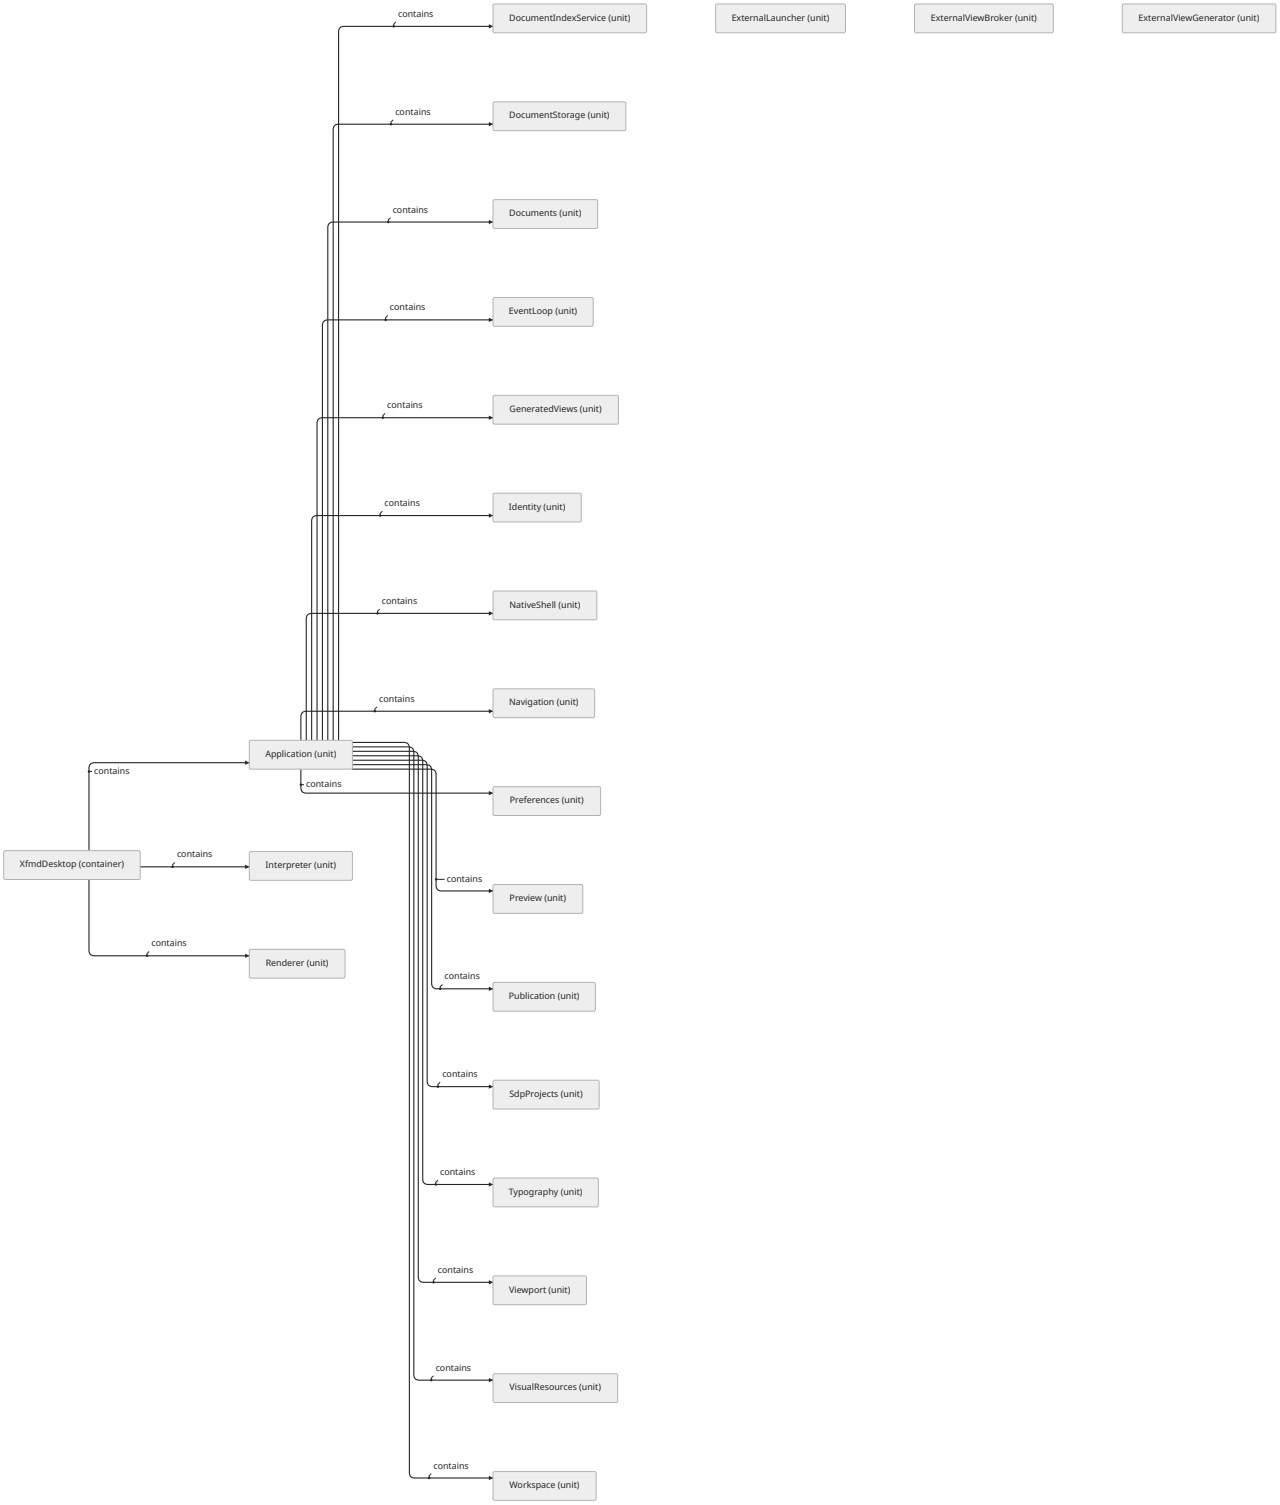
VP02 — Architecture and logical decomposition

Revision: `e2a2f39e5c78476bb1bba08e406114367eb59953f02a63e952e435c880d24007`.

Container/Unit and contains; library structure is not deployment allocation.

Complete logical architecture



Source facts: f0019, f0020, f0021, f0022, f0023, f0024, f0025, f0026, f0027, f0028, f0029, f0030, f0031, f0032, f0033, f0034, f1031, f1032, f1033.

Declarations: Application, DocumentIndexService, DocumentStorage, Documents, EventLoop, ExternalLauncher, ExternalViewBroker, ExternalViewGenerator,

GeneratedViews, Identity, Interpreter, NativeShell, Navigation, Preferences, Preview, Publication, Renderer, SdpProjects, Typography, Viewport, VisualResources, Workspace, XfmdDesktop.

Scope and notation

All declared Systems, Containers and Units in the checked model are shown, including isolated roots. Arrows mean explicit contains. This is logical decomposition, not deployment, Functionality ownership or runtime communication. No parent or connection is inferred.

Structural register

Component	Kind	Explicit parent	Contains facts
XfmdDesktop	container	Root (no declared parent)	—
Application	unit	XfmdDesktop	f1031
DocumentIndexService	unit	Application	f0019
DocumentStorage	unit	Application	f0020
Documents	unit	Application	f0021
EventLoop	unit	Application	f0022
ExternalLauncher	unit	Root (no declared parent)	—
ExternalViewBroker	unit	Root (no declared parent)	—
ExternalViewGenerator	unit	Root (no declared parent)	—
GeneratedViews	unit	Application	f0023
Identity	unit	Application	f0024
Interpreter	unit	XfmdDesktop	f1032
NativeShell	unit	Application	f0025
Navigation	unit	Application	f0026

Preferences	unit	Application	f0027
Preview	unit	Application	f0028
Publication	unit	Application	f0029
Renderer	unit	XfmdDesktop	f1033
SdpProjects	unit	Application	f0030
Typography	unit	Application	f0031
Viewport	unit	Application	f0032
VisualResources	unit	Application	f0033
Workspace	unit	Application	f0034
