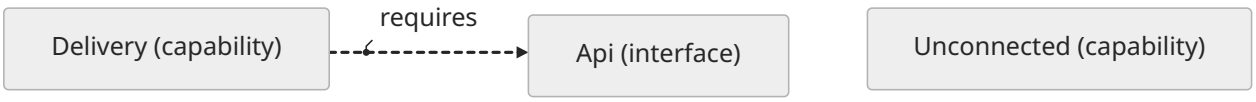
VP05 — Dependencies by mode

Revision: `1da94717409fc03ce14a88a2de6245db0f15915310ae72e8fd720d276c97a730`.

requires in mode; modes have no implicit inheritance.

Required interfaces — mode Offline



Source facts: f0000.

Declarations: Api, Delivery, Unconnected.

Scope and notation

Requires states that an Interface is necessary for a Capability in the selected Mode. It does not establish sufficiency, a provider, consumption, transport or runtime execution. Modes have no implicit inheritance. Dashed requires arrows point from Capability to Interface.

Selected mode: **Offline**. Mode source: Offline.

Capability requirements

Capability	Required interface in selected mode	Source facts
Delivery	Api	f0000
Unconnected	No declared requirement	—

Capabilities without a declared requirement remain visible; no claim of completeness is inferred. Interfaces not required in this mode are outside this projection.
