VP04 — Interfaces and collaboration

Which interfaces are used, and by whom?

consumes records use; no provider, Channel or executable message flow is inferred.

Viewpoint overview

Interfaces

Showing 1–1 of 1; page 1. The complete scope is retained across pages.

Contents

- Console (interface)

Each chapter uses the same model content as its object detail. Definitions without relationships remain visible. Large diagram sets are deferred to object details; all chapter statements and object links remain present.

Console

interface declaration: Console — Parts.design, line 3.

Declared relationships

- Worker consumes Console. — Parts.design, line 7

Related objects in this viewpoint

Worker

Interpretation and unspecified behavior

Consumes declares use of an interface. It does not identify a provider or imply a channel, transport, or runtime call.
